EDUCATION

B. Tech in Computer Science and Engineering (Health Informatics), 2022 – 2026
Vellore Institute of Technology, Bhopal. CGPA: 8.43

Intermediate (BIPC), 2020 – 2022
Vikas The Concept School, Hyderabad. Percentage: 92.2

SSC (Secondary School Certificate), 2019 – 2020
The Creek Planet School, Hyderabad. Percentage: 93.2

SKILLS

Programming Languages	Python, SQL
Web Technologies	HTML, CSS, JavaScript
Technologies	Machine Learning
Additional Skills	Excel, Word

PROJECTS

Better Health Website

- Developed a health services website using HTML, CSS, JavaScript/React, NodeJS, and MongoDB.
- Designed responsive user interfaces and implemented database integration, reducing resource access time by approximately 50% for 100+ users.

Breast Cancer Detection Model using Machine Learning

- Developed a binary classification model to predict breast cancer diagnosis (malignant/benign) using the Wisconsin Breast Cancer dataset with Python and scikit-learn.

Predicting Fake Job Posts Using Machine Learning

- Designed a web application, it offers real-time detection capabilities, enhancing the safety and efficiency of online job markets for both job seekers and employers.
- The proposed system significantly reduces manual verification efforts, lowers false positive rates, and improves the overall credibility of job postings on digital platforms.
